Open the Mac App Store to buy and download apps. This unofficial guide app for Monster Hunter World helps your journey and displays detailed statistics for:- Weapons - Weapons Tree - Weapons Statistics (Attacks, Elements, Sharpness, Craft Materials, etc.) - Monsters - Loot - Hit Table - Kinsect Color- Item - Crafting Table - How to get it - Quests - Target Monsters - Optional Monsters - Gifts- Skills - Armors- Decorations- Charms- Set-Builder- Set-Searcher- Motion Values- Special tools- Kinsect crafting- Arena (detailed search info)- Endemic LifeUnlock app to gain access to search bar throughout the app and get the information you need faster! Unlocking the app gives you also the option to turn the app icons into monsters of choice and different app themes. Disclaimer: Hunter Companion World Edition is a third-party application. The developer of this software is not affiliated with Capcom Co. Ltd. in any way. However, the creation and maintenance of this application is permitted until the withdrawal from Capcom. Oct 11, 2020 Version 3.5.4 - Due to problems unlocking from our other app subscriptions deleted (it will be back soon)- Bug fixes- Performance improvements So first of all this app is really amazing and not at all confusing moving within the app. There are a few things to add, one of the things is the travel charts that all the travel steps you can complete for exp. also another thing to add is the thrall category where you can find out the pros and cons of a certain sensation and where to find it on the map. It's going to be things like how long it takes with us without a taskmaster and how much porridge is needed. Also the part that just tells you how to get rare things in the game that are hard to find. Lastly the map has details about all the thrall camps and what types of thralls can be found and at what level. In addition to a few things it's a great app and I hope you consider this review!! This is a really shiny app and my build never saved you also have to put a pendant in the app because it will be fun to know what you can put in your weapon. You also have to put what the weapon slot augmentation has because I use this app to find weapons. Low-ranking monsters, high rankings and master ratings you have to put a report on the toughness of the master rank. The search to guide the target's paeani is a destroyer of nergigante not shara ishvalda. Put Kulve taroth and saffjiiva guns. Please do optional searches and other custom searches. Also you don't have an increased killer hood. The avoidance coat was obtained by completing the flowers of the new world sky new world. Outside the blasting scales and rumbling rumblings in the highlands have not been commissioned since iceborne came out. Also ecological reports are difficult to understand. You should also put the type of slinger ammo and what clutch claws make the monsters fall. Add also the following things about your palico: what gadgets do you have armor and what weapons you use and what level it is. Also put the rank hunter / master rank you have. Also put food and build skills that are recommended for certain monsters. You lose two major quests which are burly big bashes and until the end with you. Last put the local monster could be in (not the guide land) I never said to remove the rugged Tigrex, R. Brachy and F. Rajang are part of the next update. Rocksteady is still from the search for the angry Black Diablos and Evasion is also another search. Also, why do you think Tigrex Brute was removed? He's still part of the game, why do they have to remove any monsters?! This app changed my set in MHW. I always felt like I wasn't utilizing my bait and resources to make the best set I could. I put my bait in, run the skill search I want and bam – 10+ ways to do it. So I tried to cram in more skills with my limited resources and I got a surprise – the app tells you whether you can make it or not, and when you can't, it gives you a lot of different options on how to approach and show you what slots are left. And you can save the set or Worth! If I want additional features, it will be the ability to change the theme color to a different neutral background and for the sharpness of the weapon to update depending on the weapon and the level or sharpness you are trying to add. The damage calculator will be more than a big top, although I can't give more than 5 stars. The developer, Sebastian Kruse, has not provided details on privacy and data handling practices for For more information, see the developer privacy policy. Developers will be asked to provide privacy details when they submit their next app update. MHW Builder is a character planning tool for Monster Hunter World, giving you all the necessary data about your character:- Attack value, including raw skills, raw effectiveness, true attack, etc.- Affinity, critical mods, critical elements, critical status, etc.- Elemental value (free and hidden), elemental cap, effective element.- Defense and resists.- Special mechanics, phials, motion values and more.- Most Skills, including elemental gems, elemental res res' and so on!- Damage to every monster in the gameWeb version: version (Vanilla): Channel: reports bugs under the latest patch notes, can be found here: projects including websites, web creators and applications managed by only one person almost from scratch. It is difficult for me to keep track of every comment in each section, please use twitter or disputes to contact me. I have decided not to hide anything behind the paypal, the lite version has the same functionality as the full one. Buying a paid version is simply an act of helping the project to grow. Oct 10, 2020 Version 2.7.3 Adds 28 new Fatalist weapons. Added fatalist (Drakbone) armor alpha and beta. Added a demonlord armor set. Added a set of Velkhana gamma armor. Added Fatalis HZVs (Elder dragons). A kinsect calculator is available. Added Clutch Claw Boost skill and Shaver Jewel 3Added Diversion Jewel 3 (Provoker skill)Added Acrobat Jewel 3 (Safe Landing skill)Full patch notes on version 2.7.x: //honeyhunterworld.com/2020/10/02/mhw-builder-patch-notes-2-7-x/ I like the application, and run the numbers as they should, but I see it's missing some items here and there like Kjarr's gun, Razor Sharp, and something else. It's going well, I just can't make the complete build all I want is all, idk if it's an app just an error and i need to redownload it? Otherwise, the app is great and helps me really understand the ♡ use it all the time to make a full set easily! Choosing the specific skills I want in my build, the app does all the work for you! With iceborne updates for this everything has been touched to look better and run smoothly! Thank you so much honey hunter! This app is perfect! Saves me a lot of time and I can optimize all my equipment. What's good is to have everything if you can't be sure you're using it properly! The developer, Ilya Komarov, has not provided details about its privacy practices and data handling to Apple. For more information, see the developer privacy policy. Developers will be asked to provide privacy details when they submit their next app update. Developer Website Support App Support Privacy Policy
